

EPA Region 10 Outreach Activities
Upper Columbia River site

Purpose of outreach effort:

To discuss the findings of the site investigation and the need for a RI/FS encompassing both human health and ecological components
 To discuss and address questions about the SF Alternative/NPL-equivalent process and EPA's ongoing efforts to pursue the NPL-equivalent approach with Teck Cominco
 To explain how "an independent study of human health" issues falls short of a SF Alternative approach
 To explain that if efforts to pursue a SF Alternative approach are unsuccessful the other option forward is to pursue NPL listing
 To hear issues and concerns
